

# SV300

## SV300-R

The Platinum Packaging Group now offers a new SV300-R counter top heat sealing solution. This innovative heat sealer seals and cuts film in one easy motion from a roll of film. The SV300-R will seal film or board lids to microwaveable/ovenable pressed paper board trays & CPET trays. Our sealing solutions are perfect for your **Home-Meal-Replacement** menu. The SV300-R is affordable! Put one in each of your locations, adding theater to your deli, meat, seafood, & bakery departments. The SV300-R allows your customers to see the food is indeed freshly prepared & sealed. The compact size allows you to place a heat sealing solution almost anywhere and is very convenient to store when not in use.

### Features And Benefits

- Perfect for cutting & sealing film lids for hot, frozen, fresh or refrigerated take out foods.
- Industrial quality stainless steel & anodized aluminum construction- will last for years
- Versatile- Seals small and mid size trays in paperboard or CPET trays
- Gas spring activated, Silver Stone Sealing Plate, Ergonomic Grip
- Film hold down device holds film taut and assures good seals
- Floating head design minimizes irregular tray sealing flanges
- Film cut-off less than 1/4" from end of tray to cutting knife
- Easy to read thermometer and easy to adjust thermostat
- Efficient- Seals approximately 8-10 trays per minute
- Provides a low-cost investment and sealing option
- Easy to use- change tray sizes in seconds
- Compact- requires little table space
