

Benefits and Advantages

The EZ Bagger is designed for versatility and flexibility. This compact machine is available with a pivoting function that allows it to work both horizontally like a conventional flow wrapper or inclined depending on the product being packaged. Engineered to produce a finished bag width of up to 10 inches wide and up to 36 inches long, the EZ Bagger can package a wide variety of products in many sizes and shapes.

Features

- Omron PLC
- Foot pedal for manual use
- Photo cell for bag registration
- Auto-air regulator, filter, and lubricator
- Memory based storage of operating functions
- Compact design
- Painted mild steel frame
- Automatic infeeds available on machine
- Machine will cycle up to 30 packages per minute (Please note speeds are dependent on environment, operator and product being packaged)
