

THE PLATINUM PACKAGING GROUP

COMPOSTABLE FACTS

FACT PACKAGING	Made from sugar cane bi-products (bagasse), these trays are the packaging solution that removes non eco-friendly packaging materials from the shelf and landfills. They are excellent rigid trays that are certified 100% bio-compostable and, in a well managed compost, will compost in less than 90 days. They are moisture and oil resistant, microwaveable and ovenable.
FACT RENEW	Biocompostable packaging is made from 100% renewable resources - sugar cane crops. Sugar cane is a much more renewable resource than paper - compare its growth cycle from 2 crops per year for sugar cane to up to 7-15 years for a crop of trees.
FACT RECYCLE	Trays from sugar cane are even better for recycling - they are certified for both home and industrial composting. Widely used throughout Europe, they are an excellent sustainable packaging solution.
