Re: FDA status

Dear Sir,

The purpose of this letter is to certify that paperboard trays manufactured by Pressed Paperboard Technologies, LLC meet all current FDA regulations concerning packaging, freezing, heating and/or reconstituting of food products.

There are three components to our products, polyester-coated solid bleached paperboard, inks used on the exterior of the trays and a sealing coat which is applied over the inks. All PET extruded board used is certified acceptable for direct food contact, and all ink and coatings are FDA certified for indirect food contact. We maintain proof of compliance documentation from all of our vendors in our files.

I am also enclosing a Limitations of Use letter, which is intended to offer guidelines as to the temperature ranges and appropriate use of our products.

Feel free to contact us should you have any additional questions or need for information.

Yours truly,

Nick Lowe
Agent of PAPERTECH
