7627 Somerset Blvd., Paramount, CA 90723 P. 562-630-6700, Fax 6716, E. sales@platinumpkggroup.com

-PLAT- CVPP REELS: is made of paper with a complete PP lamination in the inside and a clear window in the center (or off center, or no window).

Our standard lamination is paper 26 gr/m² + PP 20 microns. However, we have other options, using paper 35 gr/m² and PP 25 (100g), 30 (120g) or 40 (160g) microns.

-PLAT-TEMP REELS: paper reels with a complete pet lamination in the inside and with window in the center, or off center or no window.

Our CVTEMP reels can stand temperatures up to 200 °C = 400 °F for 5-10 minutes. Here the standard is paper 26 gr/m² + pet 13 microns. Again, there are other options available.

In any case, we could send to you a sample reel for you to test exactly the material with your products.

- Reel width for each product.
- Window width
- White or natural Kraft paper?
