Rotary Filling & Sealing Machines

An eight-position rotary cup filler for die-cut foils or roll stock film with die cut.

Our machines features a **Variable Speed Drive**, precision **Cam Indexer** and **Camshaft Drive** for all mechanical motions.

Cup sizes of up to **6.0-inch diameter** and **8.0 tall** may be run on this unit in multi lane configurations.

A positive drive cup de-nester with vacuum pull down ensures that the cups are positively and accurately placed into the dial plate. Then one of our various types of fillers offered such as a volumetric piston filler with no drip nozzle will cleanly and accurately fill your container. Other types of fillers offered include weigh scale, auger and volumetric cup fillers. **No Cup- No Fill** is a standard feature. A **Second** and **Third** fill position can be installed on RX-48 as options.

The cup seal position can be either **Die-Cut Foil** or **Roll Stock Film**. The die-cut foil station features a mechanically driven pick and place with a pneumatic seal head.

The roll stock film option features a servo film index for accurate and repeatable film advancement. Film registration for pre-printed film is offered optionally. The film die cut is designed with pre-formed stainless-steel knife blades for long life.

An optional Spinning Rail over Cap Station is offered for automatic capping of the sealed containers.

Our cam driven lift and sweep discharge provides for a reliable and trouble-free method for discharging the containers on to the takeaway conveyor.

The rotary line of machinery features **Stainless Steel Construction** with **Wash Down Components**.

A PLS sequence programmer is used to control all the timing functions. This provides for a reliable control design without the need for a PLC.

Output speeds of **10-35** cycles per minute depending on the product fill speed can be expected.

This machine is simple and reliable for packaging your product at higher production rates.

This machine meets and exceeds all USDA and FDA specifications.

Standard Features Include:

Cam Index and Lift Motions

Installation and Training

No Container No Fill

No Container No Seal/Lid

All Stainless Steel, FDA Approved Material

Direct Wash Down Components (NEMA 4x, IP 67 rated components)

PLAT Machinery

Tray Sealers, Wrappers, Baggers,
Fillers, Custom Apps

Rotary Filling & Sealing Machines

Optional Equipment:

Roll Stock Film "Clear or Random Printed"

2nd Fill Position

3rd Fill Position

Multi-lane Configurations:

(As many as 6 containers per cycle
depending on their diameter.)

Additional Container Tooling

Other Optional Features Offered:

Date Coding (mechanical or ink jet)

Hopper Agitator / Level Controls

CIP Filling Systems

Take Away Conveyors

Accumulating Tables
