

THE PLATINUM PACKAGING GROUP

PrimoLinear C-10

MECHANICS

The PrimoLinear™ C-Series is specifically designed for limp, non-free flowing, or delicate products that will not move or may be potentially damaged with the use of vibration. Conveyorized models use motor-operated belts that rotate from back to front, in turn moving the product from the hopper to the weigh bucket.

SOFTWARE

Our 360 Operating Software has changed the way businesses manage their production. To the minute reporting, complete remote operation, and pre-stored software such as Crystal Reports™ allow for control and collaboration like never before.

THE PLATINUM PACKAGING GROUP

The C-Series of conveyorized linear net-weighers is designed to weigh and dispense a variety of products into bags, containers, or cases while providing optimal cleanability and serviceability.

INCREASED ACCURACY

Pneumatic gate increases overall accuracy by ensuring no additional product moves along the bulk pan.

OPEN FRAME FOR EASY CLEANING

An open mechanical design leaves no small crevices for bacteria to hide. With tool-less removable contact parts, wash-down time decreases dramatically.

INTEGRATION

Built independently from the floor frame, the PrimoLinear™ C-Series can easily be rolled into a production line or mounted to auxiliary equipment.

TOOL-LESS REMOVABLE BUCKETS

ADJUSTABLE HOPPER

TOOL-LESS REMOVABLE FUNNEL

Our 360 Operating Software was designed to make weighing easy. Every feature was created and tested with the customer in mind. Years of research, development, and 1.4 billion bytes of code later, we have designed the most user-friendly and efficient scale in the world.

REPORTING

Reporting tools include event logging & archiving of production results and uptime/downtime, yield analysis, and unit cost. Customize your data with Crystal Reports™ in any format for any information required.

ONLINE SUPPORT

Free online support allows technicians to be available in real-time eliminating delay, downtime, and their associated costs.

WINDOWS™ BASED PC CONTROLS

Easily configurable to send data, interface with ERP/MRP, the 360 Operating System also integrates with business software. It is seamless with any Microsoft software such as Outlook, Excel, Word, and Explorer. Triggers and alerts can also be set up remotely to receive reports.

THE PLATINUM PACKAGING GROUP

AVAILABLE PERIPHERALS

Additional options available upon request.

DIGITAL CAMERA

Stainless steel encased overhead IP-65 digital camera makes servicing easy. Connect in real-time to watch remotely from any location.

BAR CODE SCANNER

The bar code scanner allows operators to pull up specific recipes with ease.

IP-67 TOUCH SCREEN

Designed to withstand the harshest environments; upgrade to the durable stainless steel control panel .

FEATURES

- 10 quart (10L) weigh bucket volume
- Separate bulk & dribble settings
- Foot pedal activated or automatic dump cycle
- Reads in one gram increments
- Fully adjustable dwell time for weigh bucket door opening
- 304 stainless steel contact parts
- Off-center load-cell with overload protection
- Air regulator, filter, and lubricator
- Quick clamp weigh bucket
- Flow controls on pneumatic door opening assembly and bulk gate mechanism
- Complete stainless steel construction

Electrical

- North American 110 VAC / 60 Hz
- International 240 VAC / 1 Ph / 50 Hz
- All other electrical specifications available on request at additional cost

Weight Range

- 2 oz. to 10lbs (0.05 to 4.5 kg). Subject to product density

Air

- North American 1 CFM / 60 PSI
- International 30 L / min / 4 bar
