HEATED HOPPER

The heated hopper options include self adhesive electric heating jacket permanently attached to PPG stainless steel hoppers. The purpose of the heated hoppers is to maintain the product in the hopper at a set temperature (but are not intended to heat the product in the hopper).

KEY BENEFITS

- Prevents hot products from cooling down and setting
- Tool free, quick cleaning and change-over design
- Maintains consistent temperature of products
- Two voltage options: 110 or 220 VAC, 1300 watts.

SYSTEM INCLUDES

- Stainless steel hopper with silicone heater jacket
- Heater Controller with Digital Display (enclosed in Nema 4X Control box) including mounting bracket

FEATURES

- Reinforced stainless steel hopper with protection rings for silicone heater jacket
- Vulcanized silicone heater jacket
- Digital, closed loop heater controller
- Adjustable temperature up to 180 F (82 Celsius).
