Overwrap & Lidding Films

PAPER & LAMINATED PAPER ROLL STOCK

PLATWRAP

Cold Paper Overwrap

Paper roll with an inside plastic lamination for packaging of food products in a cold, frozen or refrigerator application.

PLATBIOWRAP

Overwrap Film

Paper roll with an inside biodegradable plastic lamination for packaging of food products in a cold, frozen or refrigerator application.

HEAT RESISTANT MATERIALS

PLATWRAP

Heatable Paper Overwrap

Paper reel laminated to heat resistant film for packing products that need to be heated inside the packaging. Paper gives a natural image and the window allows to see the product packed.

Temperature exposure up to 350° to 400° F (time exposure can vary depending on application, typically until 20 to 30 minutes, however this can vary depending on product application.)
