PLAT*Machinery* Vertical Baggers

VB BAGGER 775 / 430

Vertical Form Fill and Seal Machine

PLC controlled with touch-screen operator interface, the VB Bagger system is designed to be paired with weighing scales, counting systems, indexing conveyors and volumetric feeders or may be loaded by hand. The robust construction makes this compact machine ideal for high-volume packaging environments. Its low price and small footprint makes it a good choice for a startup or those wishing to cut preformed bag costs by producing bags from much cheaper flat film. Construction quality and choice of materials makes it perfect for food packaging in sanitary environments.

General Specifications:

- Pouch sizes from 3.2- 15.75 long by **2.5-7 3/4 wide**
- Suitable for a variety of film types
- Speeds to 60 bags per minute
- Pillow pouch standard, available stand up pouch kit
- Digital Temperature Controls maintain +/-1 degree seal bar temperature with alarm function
- Servomotor film drive for highly repeatable bag lengths
- PLC controlled with touch-screen HMI-NOT proprietary pc board.
- 208-230V AC IOA
- 80-135 PSI air connection

Optional Equipment

Multi-head combination scales, bucket elevators, counting systems and kit packaging, hole-punches for hanger bags, thermal transfer printing, platforms and mezzanines.
